Thin Solid Films 260 (1995) 260–263

Thin Solid Films

Subject Index of Volume 260

Adhesion
investigation of the atomic-scale friction and energy dissipation in diamond using molecular dynamics 205
Adsorption
surface chemical activation of quartz crystal microbalance gold electrodes — analysis by frequency changes, contact angle measurements and grazing angle FTIR 192
Aluminium
electromigration failure mechanisms in bamboo-grained Al(Cu) interconnections 124
the interactions among the Al/Mo–N/Au multilayer 93
the preparation and characterization of $AlPO_4$ thin films via laser ablation of $AlPO_4$–H_4 4
use of fractals and kinetic equations to model thermally induced hillock formation and growth in thin metal films 243
Aluminium nitride
study of the oxidation of aluminium nitride coatings at high temperature 38
Aluminium oxide
high damage threshold Al_2O_3/SiO_2 dielectric coatings for excimer lasers 86
the effect of anodizing temperature on anodic oxide formed on pure Al thin films 47
Anisotropy
symmetry constraints and epitaxial growth on non-isomorphic substrate 111
Annealing
chemical bonds and microstructure in nearly stoichiometric PECVD $aSi_xN_yH_z$ 174
chemical stability of hydrogen-containing boron nitride films obtained by plasma enhanced chemical vapour deposition 156
use of fractals and kinetic equations to model thermally induced hillock formation and growth in thin metal films 243
Anodic oxidation
the effect of anodizing temperature on anodic oxide formed on pure Al thin films 47
Atomic force microscopy
investigation of the atomic-scale friction and energy dissipation in diamond using molecular dynamics 205

Boron nitride
chemical stability of hydrogen-containing boron nitride films obtained by plasma enhanced chemical vapour deposition 156

Catalysis
epitaxially grown model catalyst particles of platinum, rhodium, iridium, palladium and rhenium studied by electron microscopy 148
Chalcogens
interface trapping states in MISIM structures, with ZnS:Mn 54

Chemical vapour deposition (CVD)
highly conductive and transparent Ga-doped epitaxial ZnO films on sapphire by CVD 19

Clusters
use of fractals and kinetic equations to model thermally induced hillock formation and growth in thin metal films 243
Coatings
elastic modulus of and residual stresses in diamond films 118
Computer simulation
fractal properties of percolating film structures 239
Condensation
fractal properties of percolating film structures 239

Deposition
effects of temperature and ion-to-atom ratio on the orientation of IBAD MoS_2 coatings 143
Deposition process
determination of the mechanical properties of r.f.-magnetron-sputtered zinc oxide thin films on substrates 58
fractal properties of percolating film structures 239
laser-assisted vacuum deposition process of 10-(1-pyrenyl)decanoic acid as revealed by in situ fluorescence spectroscopy 98
properties of tantalum oxide thin films grown by atomic layer deposition 135
real-time in-situ observation of vapor deposition polymerization of *N*-methylolacrylamide with IR–RAS 168
Diamond
elastic modulus of and residual stresses in diamond films 118
investigation of the atomic-scale friction and energy dissipation in diamond using molecular dynamics 205
stress calculations on diamond surfaces 200
Dielectric properties
the effect of anodizing temperature on anodic oxide formed on pure Al thin films 47
Diffusion
electromigration failure mechanisms in bamboo-grained Al(Cu) interconnections 124

Elastic properties
determination of the mechanical properties of r.f.-magnetron-sputtered zinc oxide thin films on substrates 58
elastic modulus of and residual stresses in diamond films 118
Electrical properties and measurements
amorphous molybdenum oxysulfide thin films and their physical characterization 21
electrical manifestation of dielectric non-centrosymmetry using Langmuir–Blodgett multilayers of ω-tricosenoic acid 222
electrical resistance drift of molybdenum silicide thin film temperature sensors 232
Electromigration
electromigration failure mechanisms in bamboo-grained Al(Cu) interconnections 124

Elsevier Science S.A.

Electron microscopy
epitaxially grown model catalyst particles of platinum, rhodium, iridium, palladium and rhenium studied by electron microscopy 148
Epitaxy
epitaxially grown model catalyst particles of platinum, rhodium, iridium, palladium and rhenium studied by electron microscopy 148
growth of $SrTiO_3$ thin epitaxial films by aerosol MOCVD 187
study of the growth of rhodium particles on different substrates 252
symmetry constraints and epitaxial growth on non-isomorphic substrate 111
X-ray study of relaxation process of strained GaAs layers grown on (100) Ge substrates 65
Ethanol
doped sol–gel films for the development of optochemical ethanol sensors 107

Fluorescence
doped sol–gel films for the development of optochemical ethanol sensors 107
laser-assisted vacuum deposition process of 10-(1-pyrenyl)decanoic acid as revealed by in situ fluorescence spectroscopy 98
Fourier transform infrared spectroscopy
linked influence of pH and cations on fatty-acid monolayer integrity related to high-quality Langmuir–Blodgett films 227
real-time in-situ observation of vapor deposition polymerization of *N*-methylolacrylamide with IR–RAS 168
surface chemical activation of quartz crystal microbalance gold electrodes — analysis by frequency changes, contact angle measurements and grazing angle FTIR 192

Gallium
highly conductive and transparent Ga-doped epitaxial ZnO films on sapphire by CVD 19
X-ray study of relaxation process of strained GaAs layers grown on (100) Ge substrates 65
Gallium arsenide
X-ray study of relaxation process of strained GaAs layers grown on (100) Ge substrates 65
Glow discharge mass spectroscopy
hysteresis effects in the sputtering process using two reactive gases 181
Glow discharge optical spectroscopy
hysteresis effects in the sputtering process using two reactive gases 181
Gold
surface chemical activation of quartz crystal microbalance gold electrodes — analysis by frequency changes, contact angle measurements and grazing angle FTIR 192
the interactions among the Al/Mo–N/Au multilayer 93
Grain boundary
electromigration failure mechanisms in bamboo-grained Al(Cu) interconnections 124
optical properties of $Zn_xCd_{1-x}Se$ films 75
Growth mechanism
fractal properties of percolating film structures 239

Heterostructures
symmetry constraints and epitaxial growth on non-isomorphic substrate 111
Hydrogen
chemical bonds and microstructure in nearly stoichiometric PECVD $aSi_xN_yH_z$ 174

Infrared spectroscopy
amorphous molybdenum oxysulfide thin films and their physical characterization 21
chemical bonds and microstructure in nearly stoichiometric PECVD $aSi_xN_yH_z$ 174
chemical stability of hydrogen-containing boron nitride films obtained by plasma enhanced chemical vapour deposition 156
Interfaces
interface trapping states in MISIM structures, with ZnS:Mn 54
investigation of the atomic-scale friction and energy dissipation in diamond using molecular dynamics 205
Ion bombardment
ion-beam-assisted deposition of Si-carbide films 32
Iron
multiphase iron nitride gradient films 1

Langmuir–Blodgett films
electrical manifestation of dielectric non-centrosymmetry using Langmuir–Blodgett multilayers of ω-tricosenoic acid 222
linked influence of pH and cations on fatty-acid monolayer integrity related to high-quality Langmuir–Blodgett films 227
monomolecular enzyme films stabilized by amphiphilic polyelectrolytes for biosensor devices 212
spreading behavior of polymerizable monolayers of acrylamides with double alkyl chains and polymerization of the LB films 217
Laser ablation
the preparation and characterization of $AlPO_4$ thin films via laser ablation of $AlPO_4$–H_4 4
Laser irradiation
high damage threshold Al_2O_3/SiO_2 dielectric coatings for excimer lasers 86
laser-assisted vacuum deposition process of 10-(1-pyrenyl)decanoic acid as revealed by in situ fluorescence spectroscopy 98

Metals
epitaxially grown model catalyst particles of platinum, rhodium, iridium, palladium and rhenium studied by electron microscopy 148
Molybdenum
sputtered molybdenum bilayer back contact for copper indium diselenide-based polycrystalline thin-film solar cells 26
Molybdenum sulphide
effects of temperature and ion-to-atom ratio on the orientation of IBAD MoS_2 coatings 143
Monolayers
spreading behavior of polymerizable monolayers of acrylamides with double alkyl chains and polymerization of the LB films 217
Multilayers
spreading behavior of polymerizable monolayers of acrylamides with double alkyl chains and polymerization of the LB films 217
the interactions among the Al/Mo–N/Au multilayer 93

Nitrides
multiphase iron nitride gradient films 1
preparation of silicon oxynitride (SiO_xN_y) thin films by pulsed laser deposition 10
the interactions among the Al/Mo–N/Au multilayer 93
Nucleation
study of the growth of rhodium particles on different substrates 252
symmetry constraints and epitaxial growth on non-isomorphic substrate 111

Optical coatings
high damage threshold Al_2O_3/SiO_2 dielectric coatings for excimer lasers 86
properties of tantalum oxide thin films grown by atomic layer deposition 135
Optical properties
amorphous molybdenum oxysulfide thin films and their physical characterization 21
optical properties of $Zn_xCd_{1-x}Se$ films 75
study of the oxidation of aluminium nitride coatings at high temperature 38
Organic substances
electrical manifestation of dielectric non-centrosymmetry using Langmuir–Blodgett multilayers of ω-tricosenoic acid 222
Organometallic vapour deposition
growth of $SrTiO_3$ thin epitaxial films by aerosol MOCVD 187
Oxidation
effects of temperature and ion-to-atom ratio on the orientation of IBAD MoS_2 coatings 143
study of the oxidation of aluminium nitride coatings at high temperature 38
Oxides
properties of tantalum oxide thin films grown by atomic layer deposition 135

Photoconductivity
interface trapping states in MISIM structures, with ZnS:Mn 54
Physical vapour deposition
real-time in-situ observation of vapor deposition polymerization of *N*-methylolacrylamide with IR–RAS 168
Piezoelectric effect
surface chemical activation of quartz crystal microbalance gold electrodes — analysis by frequency changes, contact angle measurements and grazing angle FTIR 192
Plasma processing and deposition
chemical stability of hydrogen-containing boron nitride films obtained by plasma enhanced chemical vapour deposition 156
Polymers
monomolecular enzyme films stabilized by amphiphilic polyelectrolytes for biosensor devices 212
real-time in-situ observation of vapor deposition polymerization of *N*-methylolacrylamide with IR–RAS 168
spreading behavior of polymerizable monolayers of acrylamides with double alkyl chains and polymerization of the LB films 217
Pulsed laser deposition
preparation of silicon oxynitride (SiO_xN_y) thin films by pulsed laser deposition 10

Resistivity
sputtered molybdenum bilayer back contact for copper indium diselenide-based polycrystalline thin-film solar cells 26
Rhodium
study of the growth of rhodium particles on different substrates 252

Selenides
preparation of silver selenide from chemically deposited silver films 14
Semiconductors
optical properties of $Zn_xCd_{1-x}Se$ films 75
Sensors
doped sol–gel films for the development of optochemical ethanol sensors 107
electrical resistance drift of molybdenum silicide thin film temperature sensors 232
monomolecular enzyme films stabilized by amphiphilic polyelectrolytes for biosensor devices 212
Silicides
electrical resistance drift of molybdenum silicide thin film temperature sensors 232
Silicon
preparation of silicon oxynitride (SiO_xN_y) thin films by pulsed laser deposition 10
Silicon carbide
ion-beam-assisted deposition of Si-carbide films 32
Silicon nitride
chemical bonds and microstructure in nearly stoichiometric PECVD $aSi_xN_yH_z$ 174
Silicon oxide
high damage threshold Al_2O_3/SiO_2 dielectric coatings for excimer lasers 86
Silver
preparation of silver selenide from chemically deposited silver films 14
Sputtering
amorphous molybdenum oxysulfide thin films and their physical characterization 21
electrical resistance drift of molybdenum silicide thin film temperature sensors 232
hysteresis effects in the sputtering process using two reactive gases 181
sputtered molybdenum bilayer back contact for copper indium diselenide-based polycrystalline thin-film solar cells 26
Stress
determination of the mechanical properties of r.f.-magnetron-sputtered zinc oxide thin films on substrates 58
elastic modulus of and residual stresses in diamond films 118
sputtered molybdenum bilayer back contact for copper indium diselenide-based polycrystalline thin-film solar cells 26
stress calculations on diamond surfaces 200
X-ray study of relaxation process of strained GaAs layers grown on (100) Ge substrates 65
Structural properties
properties of tantalum oxide thin films grown by atomic layer deposition 135
study of the oxidation of aluminium nitride coatings at high temperature 38
Surface and interface states
interface trapping states in MISIM structures, with ZnS:Mn 54
Surface defects
linked influence of pH and cations on fatty-acid monolayer integrity related to high-quality Langmuir–Blodgett films 227
Surface segragation
laser-assisted vacuum deposition process of 10-(1-pyrenyl)decanoic acid as revealed by in situ fluorescence spectroscopy 98
Surface stress
stress calculations on diamond surfaces 200

Titanium
hysteresis effects in the sputtering process using two reactive gases 181
Transmission electron microscopy
growth of $SrTiO_3$ thin epitaxial films by aerosol MOCVD 187
study of the growth of rhodium particles on different substrates 252
the effect of anodizing temperature on anodic oxide formed on pure Al thin films 47

Vacancies
use of fractals and kinetic equations to model thermally induced hillock formation and growth in thin metal films 243
Vanadium oxide
surface and electrical studies of $CuO:V_2O_5$ thin films 161

X-ray diffraction
growth of $SrTiO_3$ thin epitaxial films by aerosol MOCVD 187
X-ray photoelectron spectroscopy
surface and electrical studies of $CuO:V_2O_5$ thin films 161

Zinc oxide
determination of the mechanical properties of r.f.-magnetron-sputtered zinc oxide thin films on substrates 58
highly conductive and transparent Ga-doped epitaxial ZnO films on sapphire by CVD 19
